

HIRAYA SYSTEMS

# AI AUTOMATION AGENCY

Automate. Scale. Dominate.

[Book a Discovery Call](#)

# About Us

## A technical AI agency. Built different.

Hiraya Systems was founded in 2024 as a small team that builds big systems. When you work with us, you work directly with the builders — not an account manager.

We specialize in agentic AI — systems that reason, take independent actions, and operate continuously across your business. Our tools don't just answer questions. They manage pipelines, monitor operations, and surface insights without being asked.

**Hiraya** is an ancient word meaning "the fruit of one's hopes and aspirations." That's exactly what automation is: the infrastructure that makes your real goals achievable.

6 Core systems | 4 Step process | 2024 Founded

# The Problem

Most businesses know they should be using AI. Few know where to start.

## Manual Reporting

Hours every week spent on repetitive data entry and spreadsheet updates.

## Leads Slipping Through

No follow-up system means your sales team misses half the opportunities.

## Scattered Data

Sales info in one tool, inventory in another. No single source of truth.

## Repetitive Communication

Your team writes the same emails from scratch. Every. Single. Day.

# How We Work

We don't sell software. Every engagement starts with a diagnosis, not a proposal.

## 01 Discovery

We audit your current operations and map your entire workflow. We identify the highest-leverage points where automation creates the biggest impact.

---

## 02 Architecture

We design your technical ecosystem — every tool, workflow, integration, and data flow. You see exactly what we're building before we touch code.

---

## 03 Build

We execute with precision. Each component is built, tested, and verified before moving forward — no rushed deployments.

---

## 04 Launch & Scale

We deploy, monitor, and continuously optimize. Your systems are built to compound — the longer they run, the more efficient your operation becomes.

# Our Services

Six systems. One integrated operation.

## Agentic AI Chatbots

Powered by Claude AI. Query live data, book appointments, triage inboxes autonomously.

## Workflow Automation

Map manual work. Replace with automated flows. CRM updates, onboarding, reporting, communication.

## Sales Funnels

Landing pages + email sequences.  
Copywriting, design, CRM integration. Built to convert.

## Website Design

Custom-coded, high-performance websites.  
Conversion-focused web experiences built for speed and scale.

## Business Dashboards

Live dashboards pulling data from CRM, ad platforms, spreadsheets. Single source of truth.

## CRM Integration

Configure, migrate, and automate.  
GoHighLevel, HubSpot, or Notion-based.

# What We Build

## Agentic AI Chatbots & Assistants

Powered by Claude AI, our chatbots go beyond FAQs. They query live business data, capture leads, book appointments, triage inboxes, and send proactive alerts — all autonomously. Sales, HR, inventory, CRM: answered in seconds via natural language.

---

## Workflow Automation

We map the manual work in your operation and replace it with automated flows. Typical scope: CRM updates, onboarding sequences, reporting, client communication.

---

## Sales Funnels

Landing pages and email sequences built to convert. Includes copywriting, design, and integration with your CRM and email tools.

---

## Website Design

High-performance, custom-coded websites built for conversion and speed. Every site is tailored from the ground up — no templates, no bloat, no compromises. Built to represent your brand at its highest level.

---

## Business Dashboards

We pull your data from CRM, ad platforms, and spreadsheets into a single live dashboard. Retool, Looker Studio, or custom-built.

---

## CRM Setup & Integration

We configure, migrate, and automate your CRM. GoHighLevel, HubSpot, or Notion-based depending on your team size and budget.

# Packages & Pricing

|                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                          |
